Today's speaker was Dale Armstrong—TLC Plumbing

Mr. Armstrong spent a few minutes talking about the many plumbing and heating services that are offered by TLC. If you need a new installation, new equipment, or general maintenance, TLC can provide any of that. What heating or air conditioning thing do you need help with? Clogged drain? New water heater? Furnace repair? Swamp cooler repair or installation? How about a refrigerated air system? Whatever it is TLC can take care of that...and many other such services too. And if you have an emergency, TLC is available 24 hours. To get the help you need, just take that mud and yuck crusted I-thought-I-could-do-it-myself finger and dial 505-761-9644. TLC will fix it right. Dale also spent some time reminding us of the organization Viente New Mexico. Dale formed this organization as an effort to gather important information about legislation and congressional voting records, and then provide voters with the tools and information that those voters can use to confidently make decisions about which legislators are making positive or negative impacts in our state. Viente's message: Let's take pride in our state and choose to move New Mexico Forward!

- ◆ Board Members please note that this month's meeting was postponed and now will be right after breakfast this coming Tuesday, January 21st.
- ◆ Thank you to all. The Badge Board and the Speaker lists are full through March (except for March 3rd speaker slot).
